NEW QUESTION: 1
Which of the following would be the BEST population to take a sample from when testing program changes?
A. Program change requests
B. Production library listings
C. Test library listings
D. Source program listings
Answer: B
Explanation:

Explanation/Reference:
Explanation:
The best source from which to draw any sample or test of system information is the automated system.
The production libraries represent executables that are approved and authorized to process organizational datA. Source program listings would be timeintensive. Program change requests are the documents used to initiate change; there is no guarantee that the request has been completed for all changes. Test library listings do not represent the approved and authorized executables.

NEW QUESTION: 2
For client server failover purposes, the application server team has indicated that they must not have the standard 30 second delay before their switchport enters a forwarding state.
