NEW QUESTION: 1

You need to design an Azure policy that will implement the following functionality:

* For new resources, assign tags and values that match the tags and values of the resource group to which the resources are deployed.

* For existing resources, identify whether the tags and values match the tags and values of the resource group that contains the resources.

* For any non-compliant resources, trigger auto-generated remediation tasks to create missing tags and values.

The solution must use the principle of least privilege.

What should you include in the design? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
