NEW QUESTION: 1

Modem is a kind of equipment of Lan.

- A. True
- B. False

Answer: B

NEW QUESTION: 2

DRAG DROP

You use Microsoft Azure Stream Analytics to analyze data from an Azure event hub in real time and send the output to a table named Table 1 in an Azure SQL database. Table 1 has three

columns named Date, EventID, and User.

You need to prevent duplicate data from being stored in the database.

How should you complete the statement.?

To answer, drag the appropriate values to the connect targets. Each value may be used once more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 3

An analyst asks a technician to recommend a solution for a customer in the software development industry, where the customer can test a variety of OS's running the various applications that the customer produces.

The customer wants to minimize the investment in hardware.

Which of the following solutions should the technician recommended to BEST meet the customer's requirement?

- A.** Purchase a high-end system meeting the hardware requirements for all of the individual Oses and applications. Configure a VM for each testing environment.
- B.** Purchase a number of low-cost devices, installing the required Oses and applications on each one. Use separate machines for each testing environment.
- C.** Purchase a number of computers, installing a VM on each one. Configure each VM with an OS for the testing environment.
- D.** Purchase one computer and create images for each computer configuration and OS. Re-image the machine for each testing environment.

Answer: A

NEW QUESTION: 4

Universal Containers has just initiated a project to implement a custom container tracking application with a large development team. The project manager is concerned that the large number of developers in a single developer pro sandbox could lead to challenges with code being overwritten. Which two methods should be used to mitigate this risk? Choose 2 answers

- A.** Use a single sandbox and strictly coordinate development across shared components, and implement a code repository to allow developers to merge code into a common repository
- B.** Provide each developer their own sandbox developer org and implement a code repository and continuous integration to merge code into the developer pro sandbox
- C.** Replace the developer pro sandbox with a Partial copy

sandbox

D. Provide each developer their own sandbox developer org, and implement managed packages to deploy to the merge

Answer: A,B
