For IT staff, not having got the certificate has a bad effect on their job, Any time is available, for we are waiting for

your belief in our C-TADM-21 exam training material.

We have super strong team of experts.

NEW QUESTION: 1
You have an Azure Storage accounts as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer:
Explanation:

Explanation

Box 1: storageaccount1 and storageaccount2 only
Box 2: All the storage accounts
Note: The three different storage account options are:
General-purpose v2 (GPv2) accounts, General-purpose v1 (GPv1) accounts, and Blob storage accounts.
* General-purpose v2 (GPv2) accounts are storage accounts that support all of the latest features for blobs, files, queues, and tables.
* Blob storage accounts support all the same block blob features as GPv2, but are limited to supporting only block blobs.
* General-purpose v1 (GPv1) accounts provide access to all Azure Storage services, but may not have the latest features or the lowest per gigabyte pricing.

NEW QUESTION: 2

A. Option A
B. Option C
C. Option D
D. Option E
E. Option B
Answer: B,E
Explanation:
Dynamic or Stateful Packet-Filtering Firewalls
Stateful inspection is a firewall architecture classified at the network layer; although, for some applications it can analyze traffic at Layers 4 and 5, too.
Unlike static packet filtering, stateful inspection tracks each connection traversing all interfaces of the firewall and

confirms that they are valid. Stateful packet filtering maintains a state table and allows modification to the security rules dynamically. The state table is part of the internal structure of the firewall. It tracks all sessions and inspects all packets passing through the firewall.
Although this is the primary Cisco Firewall technology, it has some limitations:
Cannot prevent application layer attacks.
Not all protocols are stateful.
Some applications open multiple connections.
Does not support user authentication.
