#### **NEW QUESTION: 1**

A site would like to ensure that a given web server's default page is being served correctly prior to sending it client traffic. They assigned the A site would like to ensure that a given web server's default page is being served correctly prior to sending it client traffic. They be assigned the default HTTP monitor to the pool. What would the member status be if it sent an unexpected response to the GET request default HTTP monitor to the pool?

- A. The pool member would alternate between red and green.
- B. The pool member would be marked online (green).

- C. The pool member would be marked unknown (blue).
- D. The pool member would be marked offline (red).

**Answer: B**

**NEW QUESTION: 2**

What does the command `ip pim send-rp-discovery scope 16` achieve?

- A. it makes the router an Auto-RP mapping agent
- B. it makes the router an Auto-RP client
- C. it advertises the router as an RP with Auto-RP
- D. it enables PIM BSR

**Answer: A**

Explanation:

If no `ip pim rp-announce-filter` commands are configured, a router enabled to be an RP mapping agent (using the `ip pim send-rp-discovery` command) will accept all RP announcements for all groups from all C-RPs. Configure one or more `ip pim rp-announce-filter` commands on RP mapping agents to filter unwanted RP messages.

`ip pim send-rp-announce` To use Auto-RP to configure groups for which the router will act as a rendezvous point (RP), use the `ip pim send-rp-announce` command in global configuration mode. To unconfigure this router as an RP, use the `no` form of this command.

```
ip pim [vrf vrf-name] send-rp-announce {interface-type
interface-number | ip-address} scopetlvalue [group-list
access-list] [interval seconds] [bidir] no ip pim [vrf
vrf-name] send-rp-announce {interface-type interface-number |
ip-address}
```
