**Answer: B**

**NEW QUESTION: 2**

You are a system administrator using Microsoft Dynamics 365. You have two production instances and four sandbox instances. A new update is coming out. What is true about the updates?

- A. Updates for the production and the sandbox instances are all managed together.
- B. Updates for the sandbox instances are managed together.
- C. Updates for the sandbox instances are managed separately. The production instances are managed together.
- D. The production instances are managed separately.
- E. Updates for the production and the sandbox instances are each managed separately.

**Answer: A,C**

**NEW QUESTION: 3**

"High Availability and Cisco NSF with SSO The main objective in building a highly available data center network design is to avoid TCP session breakage while providing convergence that is unnoticeable, or as fast as possible. Cisco nonstop forwarding (NSF) with stateful switchover (SSO) are supervisor redundancy mechanisms that provide intrachassis SSO at Layers 2 to 4."

When designing remote access to the Enterprise Campus network for teleworkers and mobile workers, which of the following should the designer consider?

- A. Clientless SSL VPNs provide more granular access control than SSL VPN clients (thin or thick), including at Layer 7
- B. Maintaining access rules, based on the source IP of the client, on an internal firewall drawn from a headend RADIUS server is the most secure deployment
- C. VPN Headend routing using Reverse Route Injection (RRI) with distribution is recommended when the remote user community is small and dedicated DHCP scopes are in place
- D. It is recommended to place the VPN termination device in line with the Enterprise Edge firewall, with ingress traffic limited to SSL only

**Answer: A**

**NEW QUESTION: 4**

Your network contains an Active Directory domain named adatum.com. The domain contains a security group named G\_Research and an organizational unit (OU) named OU\_Research.

All the users in the research department are members of G\_Research and their user accounts are in OU\_Research.

You need to ensure that all the research department users change their password every 28 days and enforce a complex password that is 12 characters long. What should you do?

**A.** From Active Directory Administrative Center, create a new Password Settings object (PSO).

**B.** From a Group Policy Management, create and link a Group Policy object (GPO) to OU\_Research.

Modify the password policy in the GPO.

**C.** From a Group Policy Management, create and link a Group Policy object (GPO) to the domain. Modify the password policy in the GPO. Filter the GPO to apply to G\_Research only.

**D.** From Active Directory Users and Computers, modify the properties of the Password Settings Container.

**Answer: A**
