Systematic study, Someone will think the spare [MB-700](#) time is too short and incoherence which is not suitable for study and memory.

NEW QUESTION: 1

The Chief Executive Officer (CEO) receives a suspicious voice mail warning of credit card fraud. No one else received the voice mail. Which of the following BEST describes this attack?

- A. Whaling
- B. Vishing
- C. Spear phishing

D. Impersonation

Answer: A

Explanation:

Section: Threats and Vulnerabilities

Explanation/Reference:

Explanation:

Whaling is a specific kind of malicious hacking within the more general category of phishing, which involves hunting for data that can be used by the hacker. In general, phishing efforts are focused on collecting personal data about users. In whaling, the targets are high-ranking bankers, executives or others in powerful positions or job titles. Hackers who engage in whaling often describe these efforts as "reeling in a big fish," applying a familiar metaphor to the process of scouring technologies for loopholes and opportunities for data theft. Those who are engaged in whaling may, for example, hack into specific networks where these powerful individuals work or store sensitive data. They may also set up keylogging or other malware on a work station associated with one of these executives. There are many ways that hackers can pursue whaling, leading C-level or top-level executives in business and government to stay vigilant about the possibility of cyber threats.

NEW QUESTION: 2

Which of the following is a type of social engineering attack? (Select two.)
