So sales and customer satisfaction improved dramatically.

NEW QUESTION: 1

You are developing a SQL Server Analysis Services (SSAS) cube for the sales department at your company.

The sales department requires the following set of metrics:

Unique count of customers

Unique count of products sold

Sum of sales

You need to ensure that the cube meets the requirements while optimizing query response time.

What should you do? (Each answer presents a complete solution. Choose all that apply.)

A. Place the measures in a single measure group.

B. Place the distinct count measures in separate measure groups.

C. Use the Distinct Count and Sum measure aggregation

functions.

D. Use the Count and Sum measure aggregation functions.

E. Use the additive measure group functions.

F. Use the semiadditive measure group functions.

Answer: C,E

Explanation:

A,E, Maybe B when MD, but not for tabular

NEW QUESTION: 2

Which of the following is a valid configuration for a stack master?

A.

stack master stack master stack master stack master

B. stack master stack master stack master stack master

C. stack master stack master stack master stack master

D.

stack master stack master stack master stack master

Answer: B

Explanation:

Explanation

A stack master retains its role unless one of these events occurs: + The switch stack is reset.* + The stack master is removed from the switch stack. + or powered off -> Answer C is correct.

+ The stack master fails. + The switch stack membership is increased by adding powered-on standalone switches or switch stacks.* In the events marked by an asterisk (*), the current stack master might be reelected based on the listed factors.
