NEW QUESTION: 1

What is the maximum capacity of Cisco WCS Navigator when implemented with a Cisco Unified Wireless Network that is running version 7.0?

- A. 20 Cisco WCS servers with 30,000 APs
- B. 20 Cisco WCS servers with 20,000 APs
- C. 10 Cisco WCS servers with 20,000 APs
- D. 30 Cisco WCS servers with 30,000 APs

Answer: A

NEW QUESTION: 2

Who should drive the risk analysis for an organization?

- A. Senior management
- B. Security manager
- C. Quality manager
- D. Legal department

Answer: B

Explanation:

Explanation

Although senior management should support and sponsor a risk analysis, the know-how and the management of the project will be with the security department. Quality management and the legal department will contribute to the project.

NEW QUESTION: 3

HOTSPOT

Your network contains an Active Directory forest. The forest contains two domains named Domain1 and Domain2.

Domain1 contains a file server named Server1. Server1 has a shared folder named Share1.

Domain2 contains 50 users who require access to Share1.

You need to create groups in each domain to meet the following requirements:

* In Domain1, create a group named Group1. Group1 must be granted access to Share1.

* In Domain2, create a group named Group2. Group2 must contain the user accounts of the 50 users.

* Permission to Share1 must only be assigned directly to Group1.

Which type of groups should you create and which group nesting strategy should you use?

To answer, select the appropriate configuration in the answer area.

Answer:

Explanation:

Explanation:

Any group, whether it is a security group or a distribution group, is characterized by a scope that identifies the extent to which the group is applied in the domain tree or forest. The boundary, or reach, of a group scope is also determined by the domain functional level setting of the domain in which it resides. There are three group scopes:

universal, global, and domain local.

Security groups in a nesting strategy with global scope can have only accounts as their members. And Security groups with domain local scope can have other groups with global scope and accounts as their members.
